

Narrow Web Slitting

<https://www.protapes.com/services/narrow-web-slitting>

When volume doesn't warrant wide web slitting Pro Tapes® has the ability to economically process short runs on our narrow web slitters. Slitting methods: razor, score, rotary die and shear with widths ranging from 6mm to 300mm. Laminating up to four substrates. Substrates: Non-PSA, PSA Single-faced, PSA Double-coated, Paper, Cloth, Films, Specialty, Butyl Rubber, Foams, Vinyl, PVC, etc. Rewind methods: lock, slip and differential (each roll is independent) core.

Slitting methods: razor, score, rotary die and shear

Widths: 6mm to 300mm

Tolerance: +/- .03125, .005 upon request

Core sizes: 1" 1 ½" and 3", up to 18" finished roll O.D.

Laminating: four substrates up to 300mm

Rewind methods: lock, slip and differential (each roll is independent) core

Tabbing: Standard paper tabs for start-up and double-coated tabs for non-PSA products and lined products

Substrates: Non-PSA, PSA Single-faced, PSA Double-coated, Paper, Cloth, Films, Specialty, Butyl Rubber, Foams, Vinyl, PVC, etc.
